

SQL ENGINEERING HANDBOOK

Curated Newsletters

Staying current on the data ecosystem

Newsletters

Part of the [Resources Library](#) — [SQL Engineering Handbook](#)

Second-wave file — these seven files (`newsletters.md` through `awesome-tools.md`) weren't given the full documentation-team treatment in the original spec, just a one-line description each. This uses a lighter card format on purpose: a scannable table instead of a full [Resource Card Template](#) per entry. If a specific entry needs the deeper treatment later, it can graduate to the fuller format.

Newsletter	What It Is	Best For	Free / Paid
Postgres Weekly	Weekly digest of PostgreSQL news, releases, and community articles	Staying current on PostgreSQL specifically without manually checking release notes	Free
TLDR Data	Daily digest covering data engineering, analytics, and AI/data tooling news in a few-minutes read	A fast daily pulse on the wider data ecosystem, not just SQL	Free
Data Engineering Weekly	Curated weekly roundup of data engineering articles, tools, and industry moves	Data engineers wanting a filtered signal from a very noisy space	Free
dbt Labs Newsletter	Product updates, community highlights, and analytics-engineering practice content from dbt Labs	Anyone on the Analytics Engineer Roadmap who wants to stay current without checking the blog manually	Free
SQLServerCentral Newsletter	Long-running digest of SQL Server-specific articles, forum highlights, and scripts	Microsoft SQL Server / T-SQL practitioners specifically	Free

[!TIP] Subscribe to one or two, not all five. A newsletter you delete unread is worse than no newsletter — it just adds guilt without adding knowledge.
